

Dearest Giulia!

Have been very impatient already over long absence of news. In the meantime, Olga wrote (to you ) and will probably get a reply. My congratulations for progress in the effects of the Poliomyelitis. Again a few muscles are in action or maybe you have learned to substitute them. Hopefully it will progress further and you will one day be completely healthy. Your idea to become a masseuse is very good. I think you are too young for it but you and your Mutti can see if there is a future in it. There were famous massage therapists here, especially in Gastein where they treated the rheumatic knots with great success while the physicians didn't even believe that such knots existed though I think they were wrong. The proof of which was Gusterl's recovery from her rheumatism. But you have much experience and will accomplish much. Before I forget: Yesterday I moved to Vienna IX, Nussdorferstrasse 4, 2n floor, door 31, with the help of my landlords. So I have a new address with room and board and hopefully we will soon have put everything in order.

I thank your foster mother very much for everything and also to you your very much loving Oldster.

The beautiful mountains! Eiger Moench and Jungfrau!
