

# Sweet Corona

Children, teens, adults, elders, pastors, rich, the poor. No one is exempt from the raft of Corona. You thought the seven plagues of Egypt was bad? God saved the good and cursed the bad. Corona does not care about who you are or what position in life you play. Corona does not care if you are good or bad.

She may look and sound good as she goes down your throat, but she kills you as soon as she settles in your body. Sneaky and Invisible on the outside, but the effects show on the in. Waiting for you to go outside because she will get you and she will win.

She is a slick young thing and she loves to flirt.

She will catch your attention by the sound of a cough. She will get into your system by the spread of a sneeze, and she'll grip a hold of your pores by a small handshake.

So, cover your heart because this baby is a killer.

Corona will take your breath away, think it is a game? Look around you.

She does not have a preference. It does not matter the race or gender; she loves us all. The ones she loves the most, are the ones that are vulnerable, lovable, and adored in awed.

So, watch your loved ones, watch your friends, and stay away from her. You never know when that little slut will come in and caress you and your family. She has slept with the world, it is not hard to get in her panties,

Lock her back in hell and please throw away the key. You are not welcome in my house Jezebel; you cannot sleep with my family! Some call her Covid-19, some simply call her Rona. No matter what you call her, be safe, and stay away from lovely sweet Corona
